

Arctiq Terraform Acceleration Program (TAP)

Unlock the Value of Hashicorp Terraform with Arctiq's Expert Program

As Terraform becomes increasingly integral to infrastructure provisioning workflows, its complexity demands expert guidance for seamless integration. At Arctiq, we specialize in empowering organizations to fully leverage the capabilities of HashiCorp Terraform. Our philosophy is centered on delivering success and peace of mind by eliminating roadblocks and maximizing the value of your technology investment. We ensure repeatable success by empowering customers to master Terraform, accelerating time to value, and staying ahead of emerging challenges. The Arctiq Terraform Acceleration Program (TAP) is specifically designed to help you unlock the full benefits of HashiCorp Terraform.

Is TAP right for you?

Current Terraform OSS User

Prospective Terraform Cloud/Enterprise user evaluating the step up

Organizational Complexity

Experiencing organizational complexity where Cloud/Enterprise features are needed

Health Check & ROI

Looking for a health check or an ROI assessment of your current Terraform investment

Adoption Challenges

Encountering Terraform Cloud/Enterprise adoption challenges or a stalled rollout

Strategic Consultation

Looking for strategic and tactical guidance on broader Terraform adoption across your organization

Common Challenges

- Legacy infrastructure limits deployment speed and efficiency
- Developers need self-serve, automated infrastructure but lack a governed framework to do it safely
- Security risks from cybercrime, data breaches, and tightening audit requirements
- High costs wasteful cloud spending and inefficient provisioning processes
- Lack of in-house expertise to implement and operationalize Terraform at scale
- Configuration drift between environments causing inconsistency and compliance failures

Arctiq's Expertise

- HashiCorp Hyper-Specialized Partner
- HashiCorp Security Competency
- Terraform Certified Presales and Delivery Consultants
- Overall HashiCorp Technical and Sales Certifications across the delivery team

Your Terraform Acceleration Journey with Arctiq

Arctiq Terraform Acceleration Program (TAP) is a service package developed to be a guide for your Terraform adoption and integration journey. Our approach is specifically designed to assess and progress your environment and your organization's skill maturity utilizing a Minimum Viable Product (MVP) methodology. This approach enables easy adoption of HashiCorp Terraform, enhancing the probability of successfully implementing and operationalizing Terraform across the entire organization.

Program Overview

Duration
2-4 weeks*

Phase 1

Discovery and Interviews

- Identify current users and operators
- Set the stage with Cloud Operating Model

Phase 2

Create Deliverables

- Document current workflows and usage patterns
- Identify pain points
- Health Checks (for self-managed installs)

Phase 3

Deliverables and Walk Through

- Executive Readout and Recommendations
- Impact assessment report
- Roadmap for Adoption, Training & Education
- Statement of Work for services to deliver on roadmap

*Exact timeline will be determined based on availability, readiness, and scope

Standardize

Set up guidelines for ensuring security, compliance, and cost control. Implement role-based access controls enforcing policies and conducting audits.

Health Checks

Deep dive discovery surfaces areas for improvement.

Adopt

Enable resource provisioning across your infrastructure providers with HashiCorp Configuration Language (HCL) for IaC.

Foundation

Consultative services from Arctiq enable you to adopt Terraform and infrastructure as code (IaC) at scale — establishing the right architecture and workflows from the start.

Scale

Repeatable workflows for all teams via self-serve IaC and integration with version control systems and your deployment pipelines — so every team can provision infrastructure safely and consistently.

Build

Create reusable workflows for automating infrastructure tasks — building the patterns and modules your teams will rely on going forward.

Business Impact

- Increased team productivity with self-serve, automated infrastructure
- Cut cloud costs through cost-centric policies and elimination of idle resources
- Reduced risk of a security breach through policy-as-code and governed change workflows
- Faster time to market with consistent, repeatable automation
- Unified visibility across hybrid and multi-cloud environments with Infragraph — a centralized, event-driven knowledge graph connecting your entire infrastructure estate

Arctiq Advantage

- Expert guidance
- Consultative services
- Driving adoption for Infrastructure as Code and DevOps at scale
- Prescriptive rollout documentation
- Achieving business and technical objectives

▶ Accelerate your Terraform adoption and integration journey with Arctiq's expert guidance.
