

Cybersecurity Managed Services

Powered by Google
SecOps and Wiz

Arctiq runs 24x7x365 managed detection, response, and cloud security on Google SecOps and Wiz for organizations across North America.

24x7x365
SOC COVERAGE

~90%
ALERT NOISE CUT

~1 hr
TARGET MTTR

THE PROBLEM

Too many vendors

Detection, response, and cloud security split across disconnected tools.

Findings without priority

Teams aren't short on findings. They're short on prioritization and ownership.

Fixes that stall

Tools stay near default, and with no remediation handoff, fixes stall.

WHAT WE DELIVER

Managed Google SecOps

24/7 MXDR with custom YARA-L detections and bespoke SOAR playbooks.

Managed Wiz

Posture management and automated remediation across AWS, Azure, and Google Cloud.

Proactive threat hunting

Gemini-powered AI hunting with embedded Mandiant intelligence.

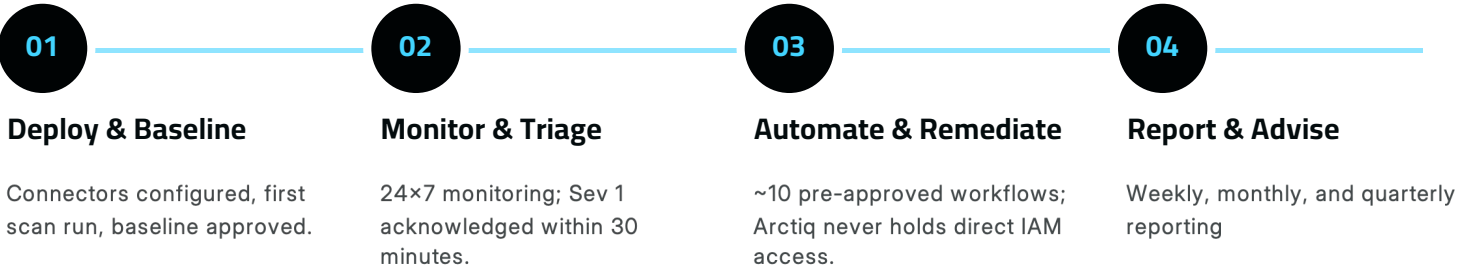

Unified Operations

One SOC queue, one Customer Success team, one platform.

HOW ARCTIQ DELIVERS IT

Managed Cloud Security, built on Wiz

WHAT CHANGES FOR YOU

Google SecOps + Wiz

- 

One SOC queue
Every SIEM you run, aggregated into a single queue.
- 

Your data stays put
Only alerts leave your environment. Never raw logs, PII, or PHI.
- 

Automation with guardrails
Every SOAR action is reversible and audited.
- 

Less alert fatigue over time
Proactive hunting and tuned detections cut noise.

WHY ARCTIQ

DISCONNECTED VENDORS	ARCTIQ
Stock detection content	Custom YARA-L detections and bespoke SOAR playbooks
Wiz left near default	Wiz operated continuously, fixes driven to resolution
A black box	Works transparently alongside your team
IR sourced after the breach	Mandiant under retainer
