

The Leading Atlassian Partner for Enterprise Transformation

Modernize Service Management. Connect Teams. Accelerate Enterprise Operations.

Arctiq ranks among the top Atlassian partners in the world, delivering the strategy, implementation, integrations, and ongoing optimization organizations need to realize the full value of the Atlassian platform.

Why Arctiq for Atlassian

- ✓ Six-time Atlassian Partner of the Year and Atlassian Enterprise Platinum Solution Partner, the top tier of Atlassian's Solution Partner Program.
- ✓ 10+ years of dedicated Atlassian delivery experience across the Arctiq organization.
- ✓ End-to-end delivery from strategy and architecture through managed services, covering every phase of the Atlassian journey.
- ✓ Backed by Arctiq's broader scale in cloud, security, automation, and observability for delivery that extends beyond the Atlassian platform alone.

ATLASSIAN PLATFORM

What Arctiq Delivers Across the Atlassian Platform

Arctiq architects, implements, and optimizes the full Atlassian ecosystem, from planning and delivery to service management, knowledge, DevOps, and AI.

Work & Knowledge Management

**ATLASSIAN**
Jira**ATLASSIAN**
Confluence

Jira & Confluence

- Agile and DevOps frameworks: boards, sprints, and release workflows for Scrum, Kanban, SAFe, and hybrid delivery
- Governance and permissions that hold at scale, with standardized templates and role definitions
- Centralized knowledge platform with space design, taxonomy, and content governance
- Jira and Confluence integration so documentation stays current with delivery

Service & Enterprise Operations

**ATLASSIAN**
Jira Service
Management

Jira Service Management & Enterprise Service Management

- Modernized incident, problem, change, request, and asset management
- Service delivery extended beyond IT into HR, Finance, Facilities, Legal, and other functions
- Unified service catalogs and self-service portals that reduce repeat tickets
- Workflow automation that removes manual approvals and provisioning steps

DevOps & Artificial Intelligence

**ATLASSIAN**
Bitbucket**ATLASSIAN**
Rovo

Bitbucket & Atlassian Rovo

- Connected source control, CI/CD pipelines, and software delivery workflows
- AI-powered content summarization, documentation, and accelerated ticket resolution
- Automated workflows that improve decision-making and reduce manual effort
- Faster, more secure end-to-end application development

Cloud & Enterprise Integration

Atlassian Cloud

- Cloud assessment, migration, and optimization, including Data Center end-of-support readiness
- Integrations with Microsoft, Google Workspace, Slack, GitHub, and Azure DevOps
- Connections into observability tools, identity providers, and security platforms
- A single operational fabric connecting Atlassian to the broader enterprise stack

END-TO-END ATLASSIAN SERVICES

Complete Lifecycle Services

Arctiq provides complete lifecycle services under its ServiceIQ methodology, spanning strategy, implementation, integration, optimization, and managed services.

WHY ORGANIZATIONS CHOOSE ARCTIQ

What Makes Arctiq Different

Enterprise Transformation Expertise

Guide the organizational change that comes with modernizing service delivery, connecting people, processes, and technology, not just deploying software.

Cloud Migration Specialists

Proven migration playbooks that reduce risk and downtime when moving from Atlassian Data Center to Atlassian Cloud.

AI & Automation Leadership

Help organizations govern and adopt Atlassian Intelligence responsibly, so automation scales without introducing new risk.
